

Models::People

Models::IModel

Models::Customer

```
graph BT; Customer[Models::Customer] --> People[Models::People]; Customer --> IModel[Models::IModel];
```

The diagram illustrates a class hierarchy where 'Models::Customer' is a base class or interface that is implemented by 'Models::People' and 'Models::IModel'. This is shown by arrows pointing from the 'Models::Customer' box to both the 'Models::People' and 'Models::IModel' boxes.
