

Models::People

Models::IModel

Models::User

```
classDiagram
    class Models_People
    class Models_IModel
    class Models_User
    Models_User --> Models_People
    Models_User --> Models_IModel
```

The diagram illustrates a class hierarchy where the `Models::User` class inherits from both `Models::People` and `Models::IModel`. The inheritance is represented by solid lines with open arrowheads pointing from the child class (`Models::User`) to the parent classes (`Models::People` and `Models::IModel`).
