

Models::People

Models::IModel

Models::User

```
graph BT; User[Models::User] --> People[Models::People]; User --> IModel[Models::IModel];
```

The diagram illustrates a class hierarchy where the `Models::User` class inherits from both the `Models::People` class and the `Models::IModel` class. This is represented by arrows pointing from the `Models::User` box to the boxes for `Models::People` and `Models::IModel`.
